

ABSTRACT OF THE DISCLOSURE**STREAMING INTERNET MEDIA RECORD AND PLAYBACK SOFTWARE
PROGRAM**

A method, apparatus, and computer instructions for
5 managing streaming media data. A graphical user
interface having a set of controls for use in managing a
media data stream is presented. User input is received
for use in managing the media data stream in which the
user input includes an identification of a source of the
10 media data stream, a start time, and a desired format.
The media data stream is requested using the start time
and the identification of the source. The media data
stream is converted into the desired format to form a
formatted media data stream. The formatted media data
15 stream is then stored on a storage media.
